Professional Summary

Computer Science student at Bina Nusantara University with interest in frontend development, mobile app development, and backend development. Experienced in building responsive web interfaces using React, TypeScript, and Tailwind CSS, as well as mobile applications using Flutter and Dart. Familiar with backend development using Express, REST API, Prisma ORM, PostgreSQL, authentication flow, and Docker. Interested in building practical software products with clean structure, reusable components, and maintainable code.

Education

Bina Nusantara University

2024 – Present

Bachelor of Computer Science

- GPA: 3.96 / 4.00
- Dean's List
- Part of S-Class 2025, Excellence Program
- Semifinalist at elevAlte x Microsoft Hackathon Hub BINUS University 2025

Projects

Koinku

Oct 2025 – Jan 2026

Frontend Lead / Team Project

koinku.my.id

Built to solve the friction of manual expense tracking, Koinku is a web platform that automates transaction logging via receipt scanning and drives user motivation through interactive savings goal tracking. Led a 3-person frontend team overseeing system structure, UI consistency, and API integrations.

- Architected responsive web interfaces using React, TypeScript, and Tailwind CSS, standardizing a reusable design system across all application views.
- Integrated client flows with backend OCR and transaction endpoints to ensure instantaneous UI updates and seamless transaction logging.
- Managed frontend task delegation and code reviews, maintaining consistent code standards and robust client-side state management.

Tech Stack: React, TypeScript, Tailwind CSS

BeeTip

Feb 2026 – Jun 2026

Frontend Developer

github.com/orde-r/BeeTip

Designed to eliminate the hassle of students losing time traveling between campus floors for meals and essentials, BeeTip is a peer-to-peer errand platform concept where students can request items and peers heading their way can pick them up and deliver them.

- Built the complete client-facing web application prototype using React, TypeScript, and Tailwind CSS as the sole frontend developer.
- Developed full authentication, order creation, and errand-matching user flows integrated with backend REST APIs.
- Implemented real-time order status tracking to ensure seamless state updates between requesters and peer couriers.

Tech Stack: React, TypeScript, Tailwind CSS

Jalan Aman
Mobile Developer

Feb 2026 – Jun 2026
github.com/zhangs-tech/jalan-aman

Designed to safeguard daily commuters from unpredicted road hazards, Jalan Aman is a community-driven mobile platform enabling travelers to crowdsource, report, and monitor real-time road disruptions in advance of arriving at their destinations.

- Integrated interactive geospatial tracking and mapping interfaces using Flutter Map and OpenStreetMap data within a Dart mobile client.
- Engineered intuitive location-based reporting flows allowing users to pin road hazards and receive proactive proximity warnings.
- Connected mobile telemetry and user reports to Express backend endpoints for live data persistence and community incident feeds.

Tech Stack: Flutter, Dart, Flutter Map, Express

Mealio
Full-stack Developer

Feb 2026 – Jun 2026
github.com/orde-r/mealio

Engineered an AI-based mobile food recommendation application designed to curate personalized dining options tailored to individual user preferences, budgets, and dietary restrictions. Handled end-to-end full-stack delivery across mobile interfaces, API architecture, and database persistence.

- Architected the complete Express backend service containerized via Docker, managing structured schema models using PostgreSQL and Prisma ORM.
- Built intelligent recommendation endpoints connected to frontend recommendation feeds for dynamic, real-time suggestion rendering.
- Developed cross-platform Flutter UI screens with modular component architecture, ensuring smooth state updates and responsive data fetching.

Tech Stack: Flutter, Express, PostgreSQL, Prisma, Docker

Organization Experience

KMBD, Keluarga Mahasiswa Buddhis Dhammavaddhana
Staff and Division Treasurer

Dec 2024 – Present

- Served as an organization staff member and supported event execution, team coordination, and operational activities.
- Tracked and managed divisional expenses to ensure accurate financial records and proper budget allocation.
- Participated as a Design and Documentation Committee Member for the Kathina Event, contributing to visual documentation and event support.
- Participated as a Fundraising Committee Member for One Million Help, a charity program focused on village outreach, socialization activities, and distribution of basic food supplies.
- Developed teamwork, communication, responsibility, and adaptability through organization and event committee experience.

Technical Skills

- **Frontend:** React, TypeScript, Tailwind CSS, JavaScript, Zustand, HTML, CSS
- **Backend:** Express, REST API, Prisma, PostgreSQL, Authentication, Docker
- **Mobile:** Flutter, Dart, Flutter Map
- **Tools:** Git, GitHub, VS Code, Postman, Figma
