## Professional Summary

Computer Science student at Bina Nusantara University with interest in frontend development, mobile app development, and backend development. Experienced in building responsive web interfaces using React, TypeScript, and Tailwind CSS, as well as mobile applications using Flutter and Dart. Familiar with backend development using Express, REST API, Prisma ORM, PostgreSQL, authentication flow, and Docker. Interested in building practical software products with clean structure, reusable components, and maintainable code.

## Education

### Bina Nusantara University

2024 – Present

Bachelor of Computer Science

- GPA: 3.96 / 4.00
- Dean's List
- Part of S-Class 2025, Excellence Program
- Semifinalist at elevAlte x Microsoft Hackathon Hub BINUS University 2025

## Projects

### Strukly

Frontend / Team Project

Frontend Lead

[github.com/mahasigma-sunib/strukly](https://github.com/mahasigma-sunib/strukly)

Led the frontend development of Strukly, an expense tracking application. Responsible for building core UI flows, organizing frontend structure, and coordinating frontend implementation with the team.

- Built responsive React interfaces using TypeScript and Tailwind CSS.
- Created reusable ProjectCard components to improve UI consistency and maintainability.
- Used data-driven rendering from a projects.ts file to manage project data efficiently.
- Integrated frontend pages and components with backend API flow.

**Tech Stack:** React, TypeScript, Tailwind CSS

### Mealio

Full-stack / Backend Project

Main Backend Developer / Full-stack Developer

[github.com/orde-r/mealio](https://github.com/orde-r/mealio)

Built the main backend for Mealio, a full-stack food-related application with Flutter frontend and Express backend. Focused on API development, database integration, authentication flow, and backend project structure.

- Built Express API structure for application features.
- Integrated PostgreSQL and Prisma ORM for database management.
- Worked on authentication flow and backend service structure.
- Prepared backend setup with Docker support.
- Connected backend services with Flutter application flow.

**Tech Stack:** Express, Flutter, PostgreSQL, Prisma, Docker

## BeeTip

Frontend Developer

Frontend / Full-stack Integration Project

[github.com/orde-r/BeeTip](https://github.com/orde-r/BeeTip)

Developed the frontend of BeeTip as the sole frontend developer. Built user interfaces, connected API flows, and handled frontend integration for authentication and order-related features.

- Built user interfaces using React, TypeScript, and Tailwind CSS.
- Integrated frontend pages with backend APIs.
- Worked with authentication and order flow.
- Supported realtime and order status interaction.

**Tech Stack:** React, TypeScript, Tailwind CSS

## Jalan Aman

Mobile Developer

Flutter / Map Integration Project

[github.com/zhangs-tech/jalan-aman](https://github.com/zhangs-tech/jalan-aman)

Developed mobile features for Jalan Aman using Flutter, with focus on Flutter Map integration and mobile user experience.

- Built Flutter mobile features using Dart.
- Integrated map functionality using Flutter Map.
- Worked with mobile UI and location-based interaction.
- Collaborated in a hybrid mobile and backend project.

**Tech Stack:** Flutter, Dart, Flutter Map, Express

## Organization Experience

---

### KMBD, Keluarga Mahasiswa Buddhis Dhammavaddhana

Dec 2024 – Present

Staff

- Served as an organization staff member and supported event execution, team coordination, and operational activities.
- Participated as a Design and Documentation Committee Member for the Kathina Event, contributing to visual documentation and event support.
- Participated as a Fundraising Committee Member for One Million Help, a charity program focused on village outreach, socialization activities, and distribution of basic food supplies.
- Developed teamwork, communication, responsibility, and adaptability through organization and event committee experience.

## Technical Skills

---

- **Frontend:** React, TypeScript, Tailwind CSS, JavaScript, Zustand, HTML, CSS
- **Backend:** Express, REST API, Prisma, PostgreSQL, Authentication, Docker
- **Mobile:** Flutter, Dart, Flutter Map
- **Tools:** Git, GitHub, VS Code, Postman, Figma

## Languages

---

Indonesian | English | Mandarin
