Professional Summary

Computer Science student at Bina Nusantara University with interest in frontend development, mobile app development, and backend development. Experienced in building responsive web interfaces using React, TypeScript, and Tailwind CSS, as well as mobile applications using Flutter and Dart. Familiar with backend development using Express, REST API, Prisma ORM, PostgreSQL, authentication flow, and Docker. Interested in building practical software products with clean structure, reusable components, and maintainable code.

Education

Bina Nusantara University
Bachelor of Computer Science

2024 – Present

- GPA: 3.96 / 4.00
- Dean's List
- Part of S-Class 2025, Excellence Program
- Semifinalist at elevAlte x Microsoft Hackathon Hub BINUS University 2025

Projects

Koinku

Oct 2025 – Jan 2026

Frontend Lead / Team Project

koinku.my.id

Web platform that automates expense tracking via receipt scanning with interactive savings goal tracking. Led a 3-person frontend team overseeing system structure, UI consistency, and API integrations.

- Built responsive interfaces with React, TypeScript, and Tailwind CSS, standardizing a reusable design system across all views.
- Integrated client flows with backend OCR and transaction endpoints for seamless, instantaneous transaction logging.

Tech Stack: React, TypeScript, Tailwind CSS

BeeTip

Feb 2026 – Jun 2026

Frontend Developer

github.com/orde-r/BeeTip

Peer-to-peer errand platform where students can request items and peers heading their way can deliver them.

- Built the complete client-facing web application with React, TypeScript, and Tailwind CSS as the sole frontend developer.
- Developed authentication, order creation, and errand-matching flows with real-time order status tracking via REST APIs.

Tech Stack: React, TypeScript, Tailwind CSS

Jalan Aman

Feb 2026 – Jun 2026

Mobile Developer

github.com/zhangs-tech/jalan-aman

Community-driven mobile app for crowdsourcing and monitoring real-time road hazards.

- Integrated interactive geospatial mapping using Flutter Map and OpenStreetMap within a Dart mobile client.
- Built location-based reporting flows for pinning road hazards and receiving proximity warnings, connected to Express backend endpoints.

Tech Stack: Flutter, Dart, Flutter Map, Express

Mealio

Full-stack Developer

AI-based mobile food recommendation app tailoring dining options to user preferences, budgets, and dietary restrictions, delivered end-to-end across mobile, API, and database.

- Architected an Express backend containerized with Docker, using PostgreSQL and Prisma ORM, with recommendation endpoints powering real-time suggestion feeds.
- Developed cross-platform Flutter UI screens with modular components and responsive data fetching.

Tech Stack: Flutter, Express, PostgreSQL, Prisma, Docker

Feb 2026 – Jun 2026

github.com/orde-r/mealio

Organization Experience

KMBD, Keluarga Mahasiswa Buddhis Dhammavaddhana

Staff and Division Treasurer

- Served as an organization staff member and supported event execution, team coordination, and operational activities.
- Tracked and managed divisional expenses to ensure accurate financial records and proper budget allocation.
- Participated as a Design and Documentation Committee Member for the Kathina Event, contributing to visual documentation and event support.
- Participated as a Fundraising Committee Member for One Million Help, a charity program focused on village outreach, socialization activities, and distribution of basic food supplies.
- Developed teamwork, communication, responsibility, and adaptability through organization and event committee experience.

Dec 2024 – Present

Technical Skills

- Frontend:** React, TypeScript, Tailwind CSS, JavaScript, Zustand, HTML, CSS
- Backend:** Express, REST API, Prisma, PostgreSQL, Authentication, Docker
- Mobile:** Flutter, Dart, Flutter Map
- Tools:** Git, GitHub, VS Code, Postman, Figma

Languages

Indonesian | English | Mandarin
