SUMMARY

Computer Science undergraduate specializing in Software Engineering, with hands-on experience in frontend and full-stack development using React, Flutter, and Express. Experienced in team-based development across multiple projects, with a focus on problem solving and writing clean, maintainable code. Strong interest in exploring new ideas and building practical, user-focused software.

EDUCATION

Bina Nusantara University
Bachelor of Computer Science

- GPA: 3.96 of 4.00 | Dean's List | S-Class

2024 - 2028
Focus: Software Engineering

PROJECTS

Frontend Developer | *LinguaScreen*

2025

Language-learning overlay that shows contextual translations and AI grammar explanations on-screen while reading.

- Semifinalist, elevAIte x Microsoft Hackathon Hub BINUS University 2025.
- Defined the core product vision with my team, designing an unobtrusive overlay that keeps readers immersed.
- Connected interface components and wired visual elements into the working demo.

Frontend Lead | *Koinku*

2025 - Present

Expense-tracking platform that automates transaction logging via receipt scanning, with interactive savings goals.

- Led a 3-person frontend sub-team, delegating tasks and reviewing work for visual and functional quality.
- Built views across the platform, standardizing a reusable React design system.
- Connected the UI to backend OCR endpoints so scanned receipts and savings progress update in real time.

Frontend Developer | *BeeTip*

2026

Peer-to-peer errand platform where students request items and peers heading their way deliver them.

- Designed the full user flow: requests, peer pickups, delivery confirmations.
- Co-developed the React web interface for order placement and task matching.

Mobile Developer | *Jalan Aman*

2026

Road-hazard reporting app for crowdsourcing and monitoring real-time road disruptions.

- Owned end-to-end mobile development, from requirements to the cross-platform Flutter app.
- Built the real-time Flutter Map interface with custom hazard indicators and event expiration.

Full-stack Developer | *Mealio*

2026

AI meal recommender that suggests meals based on mood, budget, and location.

- Built the Express backend with PostgreSQL, Prisma, and Docker from the ground up.
- Implemented the LLM pipeline parsing free-form mood, budget, and location input into structured recommendations.

ORGANIZATION EXPERIENCE

Keluarga Mahasiswa Buddhis Dhammavaddhana | *Staff and Division Treasurer*

2025 - Present

- Tracked and managed divisional expenses, ensuring accurate financial records and proper budget allocation across operational activities.
- Served as a Design and Documentation Committee Member for the Kathina Event, contributing to visual documentation and event support.
- Participated as a Fundraising Committee Member for One Million Help, a charity program focused on village outreach, socialization activities, and distribution of basic food supplies.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Dart, Java, Python, SQL, HTML, CSS
- Frameworks:** React, Tailwind CSS, Zustand, Express, Prisma, Flutter, Flutter Map
- Tools:** PostgreSQL, Docker, Git, GitHub, VS Code, Postman, Figma

SPOKEN LANGUAGES

Indonesian | English | Mandarin
